development

Learning

Teacher and students preparing the new work

Setting the context

Working from what students know and exploring new things to learn

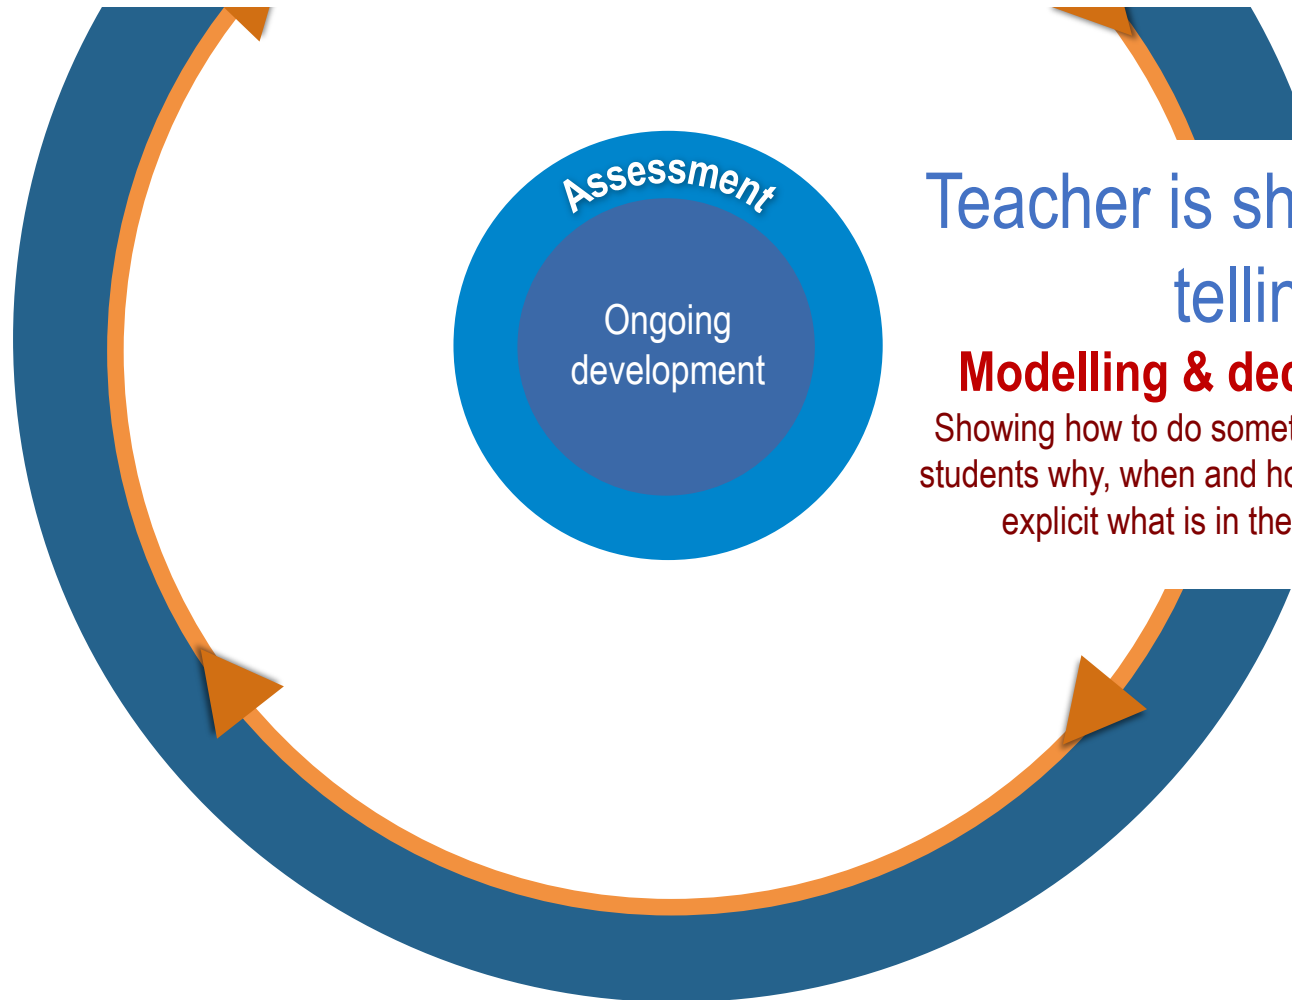

Learning

Teacher and students preparing the new work

Setting the context

Working from what students know and exploring new things to learn

Teacher is showing and telling

Modelling & deconstruction

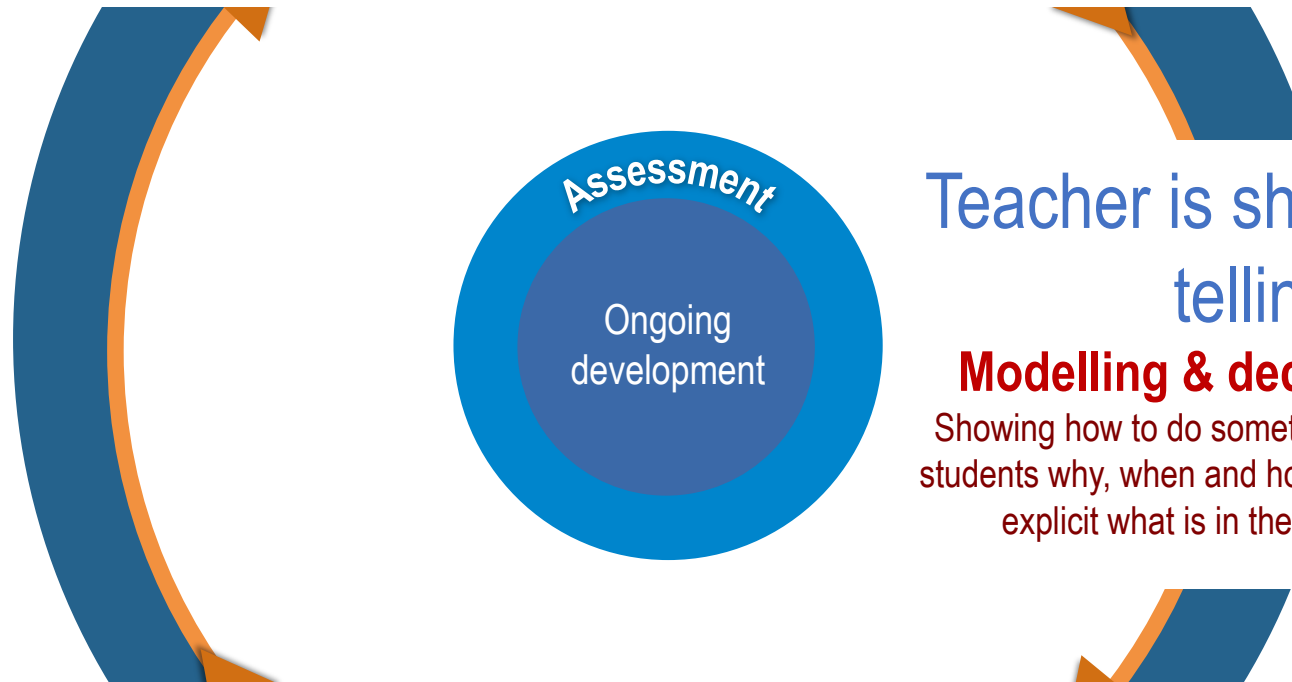

Showing how to do something and also telling students why, when and how to do it - ie making explicit what is in the teacher's head

Learning

Teacher and students preparing the new work

Setting the context

Working from what students know and exploring new things to learn

Teacher is showing and telling

Modelling & deconstruction

Showing how to do something and also telling students why, when and how to do it - ie making explicit what is in the teacher's head

Teacher and students working together

Guided construction

Now the students show and tell the teacher what the teacher showed and told them in the previous stage – ie the teacher can check that the students have got the right thinking strategies

Learning

Teacher and students preparing the new work

Setting the context

Working from what students know and exploring new things to learn

Students working in pairs, small groups or by themselves

Independent Construction

Now that the students have been prepared for success, they apply what they have learned

Teacher is showing and telling

Modelling & deconstruction

Showing how to do something and also telling students why, when and how to do it - ie making explicit what is in the teacher's head

Teacher and students working together
